AUXILIARY ROPE 3 MM

Ref: C800300100

Semi-static auxiliary rope made of 100% polyamide. This material is characterised by its high resistance and durability, as well as being a light and flexible material that facilitates the knotting of the rope and its transportation.

The auxiliary rope's sheath is made from our own type of Endurance braiding, in which the strands, grouped one by one, generate a smoother, more compact and uniform surface of the rope, making it more resistant to friction wear and tear, increasing its lifespan. In addition, this braiding is also effective in preventing the penetration of dust and small dirt particles, which contribute to greater wear and tear on the rope.

Its versatility offers multiple applications in outdoor activities, with high resistance to friction and dirt.

Technical characteristics:

- Diameter: 3 mm
- Resistance: 2,5 kN
- Weight g/m: 7,5 g
- Coil length: 100 m
- Colour: Black
- Manufactured in Sant Quirze de Besora (Barcelona-Pyrenees)

Packaging info:

- Coil supports made from pre-consumer industrial waste plastic.
- Coil cylinder made of cardboard.

Auxiliary rope. Not certified for climbing.

Información técnica:

Brand:	Fixe
Country of origin:	Barcelona - Pyrenees (Spain)
Color:	Black
Material:	Polyamide
Format:	Spool
Middle Mark:	No
Treatment:	Nature
Sheath Percentage:	57%
Type of Sheat:	Endurance
Type of Rope:	Auxiliary
Breaking Strenght:	2,5kN
Configurator:	No
Size long:	100m

Diameter:	3mm
