The Montserrat

The Montserrat is the perfect rope for those who practice sport climbing and want to start trying smaller diameters and evolve as climbers. Manageable and with a good balance between weight and resistance, it is flexible and easy to handle. It is ideal for rather long on-sight climbing routes.

Montserrat is a massif emblematic of Catalonia that is visited every year by many tourists from all over the world. It has thousands of open climbing wall and sports routes that sometimes exceed 50 meters in length. It was once one of the cradles of sport climbing, not only in Catalonia but in the entire Iberian peninsula. "El Prisionero" and "Vuelo a Ciegas" are routes that perfectly describe what it means to climb sporting routes in Montserrat.
